

YESWANTH KUMAR

Bengaluru, Karanataka | +91-9390125963 | bitrtraguntayeswanth2005@gmail.com | <https://www.linkedin.com/in/bitragunta-yeswanth-9127b62a7/> | <https://github.com/yesh-2342>

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on internship experience in mobile / web application development and Python automation. Proficient in Java, Spring Boot, React.js, and REST API development with a strong grasp of OOP, and DBMS. Built production-grade full-stack projects Seeking Software Engineer Intern / Graduate Engineer Trainee roles at product-driven companies to build scalable, user-centric applications.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Frontend: React.js, HTML5, CSS3

Backend: Spring Boot, REST APIs, Spring Security, Spring Data JPA

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Maven

Core Subjects: OOP, DBMS, Computer Networks

INTERNSHIP EXPERIENCE

App Development Intern | *Plentra Technologies Pvt. Ltd.*

July 2025– Aug 2025

- Contributed to mobile and web application development, delivering UI components and feature enhancements that reduced reported bugs by 30% across two product modules
- Collaborated with cross-functional teams on debugging, testing, and QA workflows, accelerating release cycle turnaround for 3 sprint cycles
- Implemented responsive UI improvements using JavaScript and CSS, improving cross-device compatibility across Android and web platforms

Python Development Intern | *Pinnacle Labs(paid)*

July 2025 – Aug 2025

- Designed and developed 5+ Python automation scripts leveraging OOP principles, reducing manual data-handling tasks by ~40%
- Built logic-intensive problem-solving modules covering file I/O, data structures, and algorithm optimization as part of training deliverables
- Applied clean code practices and modular design patterns, receiving mentor sign-off on all 3 assigned project deliverables

PROJECTS

AI Resume Generator | *React.js · Spring Boot · MongoDB · OpenAI API*

July 2025 – Aug 2025

- Engineered a full-stack AI-powered web app enabling users to upload resumes and JDs, generating ATS-optimized resumes via OpenAI API with ~70% reduction in manual tailoring time
- Built 8+ RESTful API endpoints with Spring Boot; implemented JWT-based authentication securing user sessions end-to-end
- Automated personalized cover letter generation using prompt engineering, supporting multi-role targeting with a single click

Bike Rental System | *React.js · Spring Boot · MongoDB*

- Developed a full-stack bike rental platform with user registration, bike listing, booking workflow, and an admin dashboard managing 50+ mock inventory records
- Implemented Spring Security for role-based access control (User / Admin), ensuring secure API access across all protected routes
- Designed MongoDB schemas and REST APIs for real-time booking management, achieving sub-100ms average query response time in testing

Book Finder Application | *HTML · CSS · JavaScript · Google Books API*

- Built a responsive single-page application that queries the Google Books API in real time, returning book metadata (ratings, authors, descriptions, covers) for any search query
- Engineered dynamic DOM manipulation and async fetch logic, reducing average search-to-result render time to under 300ms

EDUCATION

B.Tech – Computer Science & Engineering (Networks)

2023 – 2027 (Expected)

Presidency University, Bengaluru | CGPA: 6.89 / 10

CERTIFICATIONS & ACHIEVEMENTS

Python Programming – Scaler Academy

2025

Infosys Springboard – Rest Apis Spring

2026

- Solved 100+ DSA problems on LeetCode covering Arrays, Linked Lists, Trees, Graphs, and Dynamic Programming
- Maintained active GitHub profile with 3+ full-stack repositories and consistent open-source contributions
- Earned 9 MongoDB University Skill Badges covering database design, aggregation, indexing, optimization, and performance tuning.
